MENTAL HEALTH & EMOTIONAL RESILIENCE

MINDFULNESS & CBT COGNITIVE RESTRUCTURING JOURNAL

Clinical-Grade CBT Thought Records, Cognitive Distortion Identifier, Mood & Sleep Quality Log

SAGE THEME • 24 PAGES

INCLUDED ARCHITECTURE & TRACKING MODULES

1. **10 Core Cognitive Distortions Reference Guide**
   Identify All-or-Nothing Thinking, Catastrophizing, Mind Reading, Emotional Reasoning & Should Statements.
2. **CBT Thought Record Worksheets**
   Structured Trigger, Automatic Thought, Cognitive Distortion Checkboxes, Evidence & Rational Reframe.
3. **Mood & Sleep Quality Scale (1–10)**
   Daily quantitative mood, anxiety level, sleep duration, and sleep restoration tracking.
4. **Behavioral Activation & Somatic Grounding**
   5-4-3-2-1 sensory grounding, box breathing, and values-aligned daily action steps.
5. **30-Day Mood & Sleep Correlation Matrix**
   Visual trend chart linking sleep quality, mindfulness habits, and emotional baseline.

COGNITIVE DISTORTIONS IDENTIFIER (CBT REFERENCE)

Recognize automatic thinking traps

CODE	COGNITIVE DISTORTION	DEFINITION / THINKING TRAP	RATIONAL REFRAME STRATEGY
CD-1	All-or-Nothing Thinking	Viewing situations in absolute black-and-white categories.	Look for shades of gray and partial progress (0–100%).
CD-2	Catastrophizing	Predicting the worst-case disaster without realistic odds.	Ask: What is the most likely outcome? How would I cope?
CD-3	Mind Reading	Assuming you know what others think negatively of you.	Separate assumptions from verifiable spoken facts.
CD-4	Fortune Telling	Treating negative predictions about the future as fact.	Treat predictions as hypotheses to test, not certainties.
CD-5	Emotional Reasoning	"I feel anxious/guilty, therefore something bad is true."	Feelings are valid signals, not objective evidence of truth.
CD-6	Overgeneralization	Using "always" or "never" after a single negative event.	Isolate the specific event without globalizing it.
CD-7	Mental Filter	Fixating on one negative detail and ignoring all positives.	Deliberately list 3 neutral or positive facts in the situation.
CD-8	Should Statements	Rigid internal rules ("I must", "I should never").	Replace "I should" with flexible "I would prefer to".
CD-9	Labeling	Assigning global negative labels ("I am a failure").	Describe specific behaviors rather than global identity.
CD-10	Personalization	Taking 100% blame for external events outside control.	Map all external contributing factors beyond yourself.

5-4-3-2-1 SOMATIC SENSORY GROUNDING PROTOCOL

Use during acute anxiety or overwhelm

5 THINGS YOU CAN SEE: Look around the room and name 5 distinct objects, colors, or shapes in detail.

4 THINGS YOU CAN FEEL: Notice 4 tactile sensations (feet on floor, fabric on skin, cool air, chair support).

3 THINGS YOU CAN HEAR: Listen closely to 3 ambient sounds in the background without judging them.

2 THINGS YOU CAN SMELL: Identify 2 scents in the air, or take two slow, deep nasal inhalations.

1 THING YOU VALUE: Name 1 personal strength, anchor truth, or intention for the present moment.
