Claude 3.5 Sonnet Full-Stack Architect Playbook

System Prompts & Architecture Blueprints for 10x Software Engineering

EXECUTIVE PLAYBOOK ARCHITECTURE & CONTENTS:

- Full-Stack Refactoring & Architectural Reviews
- Unit & End-to-End Test Suite Generators
- SQL Schema & Query Optimization Prompts
- Automated CI/CD Pipeline & Docker Generators

BIZTOOLS EXECUTIVE SUITE • COMMERCIAL EDITION

Lifetime Commercial License • Verified Best-Seller Blueprint • https://achrafbah.github.io/tools/

Structuring Large Modular Systems in One Prompt

Claude excels at deep reasoning and whole-codebase context. Use structured markdown file blocks to orchestrate frontend and backend parity.

PROMPT: SENIOR FULL-STACK ARCHITECTURE BLUEPRINT

```
You are a Principal Software Architect. Review the following API endpoints and design a
resilient, TypeScript-first React & Node.js architecture with clean error boundaries, type
inference, and optimistic UI updates.
```

CRITICAL EXECUTION CHECKPOINTS & METRICS:

- [ ] Define strict TypeScript interface schemas
- [ ] Implement zero-runtime schema validation (Zod)
- [ ] Setup robust try/catch with status codes

Producing 100% Coverage Vitest & Cypress Suites

Turn ambiguous user stories into deterministic test suites that catch edge cases and network timeouts before production deploy.

PROMPT: EXHAUSTIVE EDGE-CASE TEST SUITE

```
Generate comprehensive Vitest unit tests for the following function. Cover: nominal paths, null/
undefined inputs, boundary integer values, asynchronous rejection, and concurrency race
conditions.
```

CRITICAL EXECUTION CHECKPOINTS & METRICS:

- [ ] Mock external HTTP network calls
- [ ] Verify assertion density (>2 per test case)
- [ ] Test error boundary fallback renders
