1. Bracketed variables like [TARGET AUDIENCE], [OFFER PRICE], or [TECH STACK] are dynamic slots—replace them with your specific context before running.
2. Chain prompts sequentially: use the output of the Research/Architecture prompt as the context window input for the Execution prompt.
3. Store your top-performing customized prompts in a dedicated Notion, Obsidian, or Custom GPT / Claude Project knowledge base.

MODULE 01 • IMPLEMENTATION BLUEPRINT

The Winning Product Validation Matrix & Break-Even ROAS Math

80% of e-commerce failures happen before the first ad is launched—by picking low-margin commodities with no visceral emotional or functional pain.

MINIMUM THRESHOLD: 4.0x Landed COGS Markup | Score >= 80/100

Validation Criterion	Weight	Failing Product Trap (Avoid)	Winning Product Standard (Scale)
1. Visceral Pain or Status Solver	20 pts	Mild "nice-to-have" novelty trinket.	Solves physical discomfort, daily frustration, insecurity, or pet/baby/beauty anxiety.
2. Gross Margin & AOV Headroom	20 pts	Sells for $19 with $9 landed COGS ($10 margin cannot absorb $15 CPA).	Landed COGS <= $12 with perceived value supporting $49-$89 AOV (via bundles).
3. Instant 3-Second Visual Demo	15 pts	Requires 45 seconds of explanation to understand.	Visually demonstrates the before/after mechanism in the first 2.5 seconds on mute.
4. Repeat / Consumable / Bundle Potential	15 pts	One-time purchase with zero natural add-ons.	Naturally sold in 2-packs/3-packs or has a consumable refill/accessory upsell.
5. Competitor Ad Longevity Signal	15 pts	Either zero ads exist OR 500 stores running identical AliExpress video.	2-5 competitors running active Meta/ TikTok ads for >30 consecutive days with weak branding.
6. Shipping Weight & Return Risk	15 pts	Heavy/fragile glass or complex sizing (shoes/fitted apparel with 25% return rate).	Under 500g, durable ePacket/3PL friendly, one-size or simple variant selection.

PROMPT #E101 The 10-Point Product Validator, Break-Even ROAS & Positioning Engine — Claude 3.5 Sonnet / GPT-4o

```
ROLE: Act as an 8-Figure DTC Brand Director and E-Commerce Unit Economics Analyst.
CANDIDATE PRODUCT: [PRODUCT DESCRIPTION]
LANDED COGS (PRODUCT + SHIPPING): [$X] | PROPOSED SELLING PRICE: [$Y]
COMPETITOR AMAZON / TRUSTPILOT REVIEWS: [PASTE 10-20 1-STAR TO 4-STAR REVIEWS OF SIMILAR
PRODUCTS]
TASK: Audit this product's viability and engineer a differentiated brand angle.
DELIVERABLE:
1. 100-Point Validation Scorecard Table across the 6 core criteria + Go/No-Go Verdict.
2. Unit Economics & Break-Even ROAS Table: Calculate Gross Margin $, Payment Processing
(2.9% + $0.30), Break-Even CPA, and Break-Even ROAS for 1-Unit vs. 2-Unit Bundle vs. 3-
Unit Bundle.
3. Competitor Weakness Exploitation: Extract the top 3 complaints from competitor reviews
and show how to position our version/offer as the upgraded solution.
4. 3 Distinct Sub-Avatar Angles: Identify 3 unexpected buyer personas we can target with
separate ad creatives (e.g., Nurses on 12-hour shifts vs. Frequent Travelers vs.
Postpartum Moms).
```

EXPECTED DELIVERABLE: 100-point Go/No-Go audit, Break-Even ROAS math across bundles, and 3 high-converting buyer avatars.

OPTIMIZATION LEVER: Often a saturated product becomes a massive winner simply by repositioning it for a hyper-specific avatar (e.g., selling a posture brace specifically for software engineers).

MODULE 02 • IMPLEMENTATION BLUEPRINT

TikTok & Meta UGC Ad Scripts & The Modular 3x2x2 Creative Matrix

In the Andromeda Meta and TikTok algorithms, your creative IS your targeting. Use modular script architecture to produce 12 testable ads from 1 shoot.

AD BENCHMARKS: >35% Thumbstop Rate (3s) | >12% Hold Rate (15s) | >1.8% Outbound CTR

Never film a single static UGC script. Instead, instruct every creator (or AI video workflow) to record 3 Hooks + 2 Bodies + 2 CTAs. Mixing and matching those modular clips in CapCut instantly yields 3 x 2 x 2 = 12 distinct ad variations to feed Meta Advantage+ and TikTok Smart Performance campaigns.

PROMPT #E201 The Modular 3x2x2 UGC Video Ad Script Generator (12 Ads in 1 Shoot) — Claude 3.5 Sonnet

```
ROLE: Act as a Direct-Response Paid Social Creative Strategist ($500k+/mo Meta & TikTok ad spend experience).
PRODUCT: [PRODUCT NAME] | CORE PROBLEM SOLVED: [PAIN] | TARGET AVATAR: [AVATAR]
OFFER: [E.G., BUY 2 GET 1 FREE + FREE SHIPPING TODAY]
TASK: Write a Modular UGC Production Script designed so 1 creator can film 3 Hooks, 2 Bodies, and 2 CTAs (yielding 12 testable ad combinations).
SCRIPT STRUCTURE (2-COLUMN VISUAL ACTION + SPOKEN AUDIO):
- HOOK 1 (0-3s - Negative/Warning Callout): "Stop doing [Common Habit] if you deal with [Pain]..." + jarring visual pattern interrupt.
- HOOK 2 (0-3s - TikTok/Social Proof Discovery): "I finally caved and bought the viral [Product] after seeing it 10 times..."
- HOOK 3 (0-3s - Sceptic-to-Believer Visual Demo): Extreme close-up of the mechanism working in 2 seconds + "I genuinely thought this was a scam until..."
- BODY A (3-22s - Problem -> Mechanism -> Immediate Relief): Visceral demonstration of old frustration vs. 3-second solution + 3 rapid benefit callouts.
- BODY B (3-22s - Us vs. Cheap Alternatives Comparison): Side-by-side comparison showing why standard store/Amazon versions fail and why ours lasts.
- CTA 1 (22-28s - Scarcity + Risk Reversal): Mention recent sell-out risk + 30-day money-back guarantee.
- CTA 2 (22-28s - Bundle Value Anchor): Highlight the Buy-2-Get-1-Free bundle deal at the link below.
```

EXPECTED DELIVERABLE: Complete modular creator brief producing 12 high-converting UGC ads from a single 15-minute filming session.

OPTIMIZATION LEVER: Add native TikTok/Reels text stickers in the top-center safe zone during the first 3 seconds—80% of users scroll with sound off or low.

PROMPT #E202 — 30 Scroll-Stopping 3-Second Visual & Verbal Hooks Vault Generator

Claude 3.5 Sonnet

```
ROLE: Act as a Viral TikTok Shop & Meta Reels Hook Specialist.
PRODUCT: [PRODUCT] | TARGET BUYER: [AVATAR]
TASK: Generate 30 distinct 3-Second Hooks (10 Verbal Line + Visual Action pairs across 3
psychological buckets):
Bucket 1 (10 Hooks): Visceral Pain & Embarrassment ("Nobody talks about how embarrassing
[Problem] is until...")
Bucket 2 (10 Hooks): Oddly Satisfying / Sensory Demo (Visual physical action that forces
the brain to watch the completion loop)
Bucket 3 (10 Hooks): Authority / Insider Secret ("As a [Profession/Mom/Specialist], here
is the one $39 upgrade I tell everyone to get...")

Visual Action | On-Screen Caption Sticker].
```

EXPECTED DELIVERABLE: 30 ready-to-shoot 3-second hooks with exact visual blocking and on-screen caption text.

OPTIMIZATION LEVER: If an ad has a good Hold Rate and CTR but a high CPM/CPC, you don't need a new video—just swap the first 3 seconds.

PROMPT #E203 — Meta Ads Primary Text, Headline & Static Image Concept Architect

Claude 3.5 Sonnet / GPT-4o

```
ROLE: Act as a Meta Ads Media Buyer and Static Creative Designer.
PRODUCT: [PRODUCT] | OFFER: [OFFER] | AVATAR: [AVATAR]

Ends Tonight").
```

EXPECTED DELIVERABLE: 5 high-converting static ad wireframes + 5 Meta Primary Text and Headline combinations.

OPTIMIZATION LEVER: Static image ads often achieve 30-40% lower CPMs than video ads in Meta Advantage+ campaigns and act as powerful retargeting anchors.

1. If ATC < 8%: Diagnose Above-the-Fold clarity, image carousel sequence (lifestyle vs.

(unexpected shipping fees, distracting popups, missing Express Pay buttons).
3. If Checkout Initiation is High (>6%) but Purchase < 2.2%: Diagnose shipping cost
threshold, payment methods (Shop Pay, Apple Pay, PayPal, Klarna), and delivery date
transparency.

transformation story + answer the top 3 hesitations + highlight the 30-Day Guarantee.

MODULE 06 • IMPLEMENTATION BLUEPRINT

Media Buying Diagnostics, Scaling Rules & AI Customer Support

Stop guessing. Read Meta/TikTok ad metrics like a forensic surgeon, scale winning creatives from $50/day to $2,500/day, and automate 80% of customer tickets.

SCALING PROTOCOL: Scientific Kill/Scale Rules | Zero Emotional Spend

Metric Bottleneck	Healthy Benchmark	Root-Cause Diagnosis	Exact Actionable Fix
Low Thumbstop Rate (<25%)	32% - 45%+ (3s Views / Impressions)	First 3 seconds fail to arrest the scroll or look like a boring corporate ad.	Keep the video body; swap in 3 new visual/verbal hooks from Prompt #E202.
Low Hold Rate (<8%)	12% - 20%+ (15s ThruPlay / 3s Views)	Pacing after second 3 is too slow; mechanism isn't demonstrated visually.	Cut dead air, show the physical product demo at 0:04, add faster 2-second cuts.
Low Outbound CTR (<0.9%)	1.5% - 2.8%+	Viewers watch the video entertainment but feel zero urgency to click and buy.	Strengthen the final 5-second CTA and highlight the Bundle Offer in the Headline.
High CPC / High CPM (>$45)	CPM $14 - $28 / CPC <$1.20	Ad creative has low engagement or narrow audience fatigue.	Go Broad (open targeting) and launch 3 static image ads (Prompt #E203) to lower blended CPM.
High CTR (>2%) but Low ROAS (<1.2)	ROAS > 2.2x+ (above Break-Even)	Disconnect between Ad Promise and Product Page (or broken mobile checkout).	Run Prompt #E401 CRO Audit; ensure the exact bundle promised in the ad is pre-selected on the PDP.

PROMPT #E601 — **AI Customer Support (Gorgias / Zendesk) Order Triage & Instant Resolution Agent** — GPT-4o / Claude 3.5 Sonnet

```
ROLE: Act as an Autonomous DTC Customer Experience Agent integrated with Shopify and

- Processing Time: [24-48 Hours] | Shipping Window: [5-8 Business Days]
- Refund / Replacement Policy: [30-Day Guarantee; Always offer Instant Free Replacement +
20% Keep-It Discount BEFORE processing a full refund to save margin].
CUSTOMER TICKET: {{customer_message}}
SHOPIFY ORDER DATA: Order #{{order_number}} | Status: {{fulfillment_status}} | Tracking:
{{tracking_url}} | Last Scan: {{tracking_status}}
TASK: Classify the ticket intent (WISMO "Where Is My Order", Damaged/Defective, Refund
Request, Pre-Sale Question, Address Change) and write an empathetic, brand-aligned
response that resolves the issue in 1 touch while protecting store revenue and preventing
chargebacks.
```

EXPECTED DELIVERABLE: Production system prompt for Gorgias/Zendesk AI agents resolving 80% of WISMO and return tickets automatically.

OPTIMIZATION LEVER: Offering a "Keep the product + receive a 35% partial refund or free replacement" saves 45% of return requests while leaving the customer delighted.
