MODULE 01 • IMPLEMENTATION BLUEPRINT

The High-CPM Niche Selection Matrix & Channel Economics

Stop chasing empty vanity views. Engineer your faceless media asset in high-intent verticals where advertisers and buyers happily spend money.

RPM DIFFERENTIAL: 15x Higher Revenue Per 1,000 Views

A faceless entertainment channel earning a $1.20 RPM requires 8.3 million monthly views to make $10,000. A faceless B2B AI/Software or Financial Systems channel with a $28 RPM + a $39 digital product + 30% recurring SaaS affiliates hits $10,000/month on just 45,000 targeted monthly views.

Niche Vertical	Avg YouTube RPM	Digital Product Fit	Affiliate / Sponsor Potential	Total Value Per 1k Views (EPV)
AI Workflows, Prompts & Productivity	$22 - $38	Prompt Vaults & Templates ($29-$99)	30% Recurring SaaS (Make, ElevenLabs, Cursor)	$85 - $160 per 1k views
Personal Finance, Investing & Wealth	$25 - $48	Portfolio Trackers & Tax Guides ($39)	Brokerages, High-Yield Apps ($50-$150 CPA)	$90 - $180 per 1k views
B2B Case Studies & Business Breakdowns	$18 - $32	Playbooks & Industry Reports ($49)	B2B SaaS, Shopify, HubSpot Sponsors	$70 - $130 per 1k views
E-Commerce, Side Hustles & Solopreneurship	$20 - $36	Launch Kits & Swipe Vaults ($37)	Shopify, TikTok Shop Tools, Hosting	$80 - $150 per 1k views
Cybersecurity, Coding & Tech Explainers	$16 - $29	Cheat Sheets & Boilerplates ($49)	VPNs, Cloud Providers, DevTools	$60 - $115 per 1k views
High-Performance Health & Biohacking	$14 - $24	Protocol Trackers & Meal Systems ($29)	Supplements, Wearables (15-25% RevShare)	$50 - $95 per 1k views

PROMPT #F101 **High-CPM Faceless Sub-Niche & Outlier Opportunity Finder** Claude 3.5 Sonnet / GPT-4o

```
ROLE: Act as a YouTube Media Strategist and Digital Product Monetization Architect.
BROAD INTEREST AREA: [E.G., AI TOOLS / BUSINESS HISTORIES / PERSONAL FINANCE / SOFTWARE]
TASK: Carve out a defensible, high-RPM "Blue Ocean Sub-Niche" and channel identity that
can monetize from Video #1.
DELIVERABLE:
1. 3 Specific Sub-Niche Positioning Angles with Target Viewer Avatar (Age, Income, 3 AM
Problem).
2. The "Outlier Validation Criteria": How to verify on YouTube that channels with <15,000
subscribers are getting >50,000 views on single videos in this sub-niche.
3. Day-1 Monetization Pair: For each angle, specify the exact $29-$49 Digital Product + 3
Recurring Affiliate programs to put in the description of every video.
4. Channel Brand Bible: 5 Channel Names, Visual Aesthetic Style (e.g., Dark Mode Motion
Graphics, Isometric Minimalist, Documentary Archive), and Channel Trailer Hook.
```

EXPECTED DELIVERABLE: 3 validated high-RPM sub-niches paired with immediate digital products and visual branding.

OPTIMIZATION LEVER: An "Outlier Video" is any video with 5x-10x more views than the channel's subscriber count—build your first 10 videos around proven outlier topics.

MODULE 02 • IMPLEMENTATION BLUEPRINT

Viral Packaging: CTR Title Engineering & Thumbnail Psychology

Never write a script before designing the Title and Thumbnail. If your Click-Through Rate (CTR) is below 6%, even a masterpiece script dies at 200 views.

TARGET BENCHMARK: 7.5% - 11.5% Browse/Suggested CTR

[PACKAGING LAW] THE 3-ELEMENT THUMBNAIL LAW & COMPLEMENTARY TITLE RULE

1. Maximum 3 visual focal points in the thumbnail (1 Hero Visual Contrast + 1 Quantified Result/Arrow + 2-4 Word Curiosity Text).
2. NEVER repeat the video title inside the thumbnail text. The Title states the Topic/Stakes; the Thumbnail creates the Visual Curiosity Gap ("How is that possible?").
3. Design and inspect your thumbnail at 160x90 pixels (mobile feed size)—if the text cannot be read in 0.4 seconds, make it 2x larger.

PROMPT #F201 The Outlier Title & Thumbnail Complementary Packaging Engine — Claude 3.5 Sonnet

```
ROLE: Act as a YouTube Packaging Director for top 1% faceless educational & documentary
channels.
CORE VIDEO TOPIC: [TOPIC] | VIEWER TRANSFORMATION / PAYOFF: [PAYOFF]
TASK: Engineer 10 high-CTR Title + Thumbnail pairs BEFORE we write the script.
FOR EACH OF THE 10 CONCEPTS PROVIDE (IN A TABLE):
1. Psychological Angle: [Time-Compression / Extreme Contrast / Secret System / Costly
Mistake / Case Study Breakdown].
2. Video Title (Strictly under 52 characters so it never truncates on mobile).
3. Thumbnail Visual Concept: Exact layout (Left vs. Right split, Before/After, Zoomed UI
Highlight, or Documentary Hero Object).
4. Thumbnail Text Overlay (Strictly 2 to 4 punchy words that complement—never repeat—the
title).
5. Midjourney v6 / Flux Prompt to generate the clean background/hero asset for this
thumbnail.
```

EXPECTED DELIVERABLE: 10 complete Title + Thumbnail concepts with Midjourney prompts and mobile truncation checks.

OPTIMIZATION LEVER: Test 3 thumbnail variations using YouTube's native "Test & Compare" feature on every upload.

MODULE 03 • IMPLEMENTATION BLUEPRINT

High-Retention Scriptwriting Formulas (70%+ AVD Architecture)

How to engineer scripts that eliminate the first-30-second drop-off and hold viewer attention through open loops and visual pattern interrupts.

RETENTION TARGET: >72% at 0:30 Mark | >50% Full-Video AVD

When you ask standard ChatGPT to "Write a YouTube script," it writes a slow, polite school essay ("Hey guys, welcome back to the channel! Today we are going to talk about..."). That opener loses 55% of viewers in 12 seconds. Every faceless script must use the 5-Part Retention Arc below.

Time Stamp Window	Retention Block	Psychological Objective	Scripting Rule
0:00 - 0:08	1. Click Confirmation & Shock	Prove immediately they clicked the right video + drop a shocking stat or visual proof.	Zero channel intro. Start mid-action with the core tension.
0:08 - 0:25	2. The Stakes & The Gap	Explain why the old way is broken and what happens if they ignore this shift.	Use "You" language and show the exact gap between A and B.
0:25 - 0:40	3. The Roadmap & Payoff Loop	Promise a specific 4-step system, holding the #1 secret for step 4.	Open a curiosity loop that only closes in the final 2 minutes.
0:40 - 9:30	4. The Value Escalation Body	Deliver compact insights with a new Mini-Hook ("But here is the catch...") every 90 seconds.	Every point must follow: Claim -> Concrete Example -> Visual Cue -> Transition Loop.
9:30 - 10:00	5. The Snap-End & Bridge CTA	Never say "In conclusion, thanks for watching!" Pivot directly to the next video or free vault.	Keep retention flat until the final second with an abrupt bridge CTA.

PROMPT #F301 **The 10-Minute High-Retention Faceless YouTube Script Architect** Claude 3.5 Sonnet

```
ROLE: Act as a Lead YouTube Retention Scriptwriter (MrBeast pacing + Vox/Johnny Harris visual storytelling + Alex Hormozi clarity).
VIDEO TITLE: [TITLE] | THUMBNAIL CONCEPT: [THUMBNAIL] | TARGET LENGTH: [1,600 WORDS / ~10 MINS]
MONETIZATION BRIDGE: [FREE LEAD MAGNET OR DIGITAL PLAYBOOK IN DESCRIPTION]
TASK: Write a complete, production-ready voiceover script with synchronized visual B-roll cues every 4-6 seconds.
STRICT RETENTION RULES:
1. First 30 Seconds (The Hook Lock): Sentence 1 must directly validate the thumbnail/title with a bold proof point. Open 2 curiosity loops before 0:30. Zero "Welcome back to the channel" fluff.
2. Conversational Spoken Rhythm: Write at a 6th-grade reading level. Short sentences. Use phonetic emphasis markers (caps or italics) and natural pause indicators `[pause 0.4s]` for ElevenLabs voice synthesis.
3. The 90-Second Re-Hook Rule: Between every major section, write a bridge transition ("Now, step 1 gets you started, but 90% of people fail right here because of one hidden trap...").
4. Native Monetization Integration: At the 45% mark (peak engagement), weave a 15-second natural mention of [MONETIZATION BRIDGE] as the fast-track implementation toolkit.
5. Snap-End Outro: Transition from the final point directly into why they MUST watch [NEXT VIDEO TOPIC] or grab the toolkit in the last 12 seconds.
```

EXPECTED DELIVERABLE: Complete 1,600-word spoken script with ElevenLabs pacing tags and 4-second visual B-roll cues.

OPTIMIZATION LEVER: Generate the Hook + Outline first, then prompt Claude to write Modules 1-2 and Modules 3-4 in two separate turns for maximum depth.

MODULE 05 • IMPLEMENTATION BLUEPRINT

The Short-Form Viral Factory (TikTok, IG Reels & YouTube Shorts)

Engineer 45-to-58 second vertical videos with 110%+ loop retention that funnel thousands of daily viewers into your bio link and DM automation.

VIRAL METRIC: >78% Viewed-vs-Swiped-Away | >105% Average Percentage Viewed

PROMPT #F501 **The 50-Second Infinite-Loop Short/Reel/TikTok Script Generator** Claude 3.5 Sonnet

TASK: Write 5 distinct 50-second vertical video scripts (135-150 words each) engineered
for >80% Stay-vs-Swipe rate and seamless infinite looping.
MANDATORY SHORT-FORM FORMULA FOR EACH SCRIPT:
- [0-2s] THE VISUAL & VERBAL STOP: Controversial 8-word statement + visual curiosity
trigger on frame 1.
- [2-12s] THE AGITATION TWIST: Why what they are currently doing is costing them [X].
- [12-40s] RAPID-FIRE 3-STEP VALUE: 3 ultra-specific steps or tools delivered at high
velocity (zero filler words).
- [40-47s] THE MANYCHAT DM TRIGGER: "Comment '[KEYWORD]' and I'll DM you the entire copy-
paste PDF playbook free."
- [47-50s] THE SEAMLESS INFINITE LOOP CONNECTOR: The final half-sentence must
grammatically connect directly back into the first sentence of [0-2s] (e.g., ends with
"...which is the exact reason why" -> starts with "99% of people use ChatGPT wrong...").
```

EXPECTED DELIVERABLE: 5 complete 50-second vertical scripts with seamless grammatical loop endings and ManyChat DM triggers.

OPTIMIZATION LEVER: When viewers don't realize the video restarted until 2 seconds into the second loop, your retention spikes over 105% and triggers algorithmic distribution.
