SOC2 Type II Trust Services Criteria Preparation

Winning Enterprise Deals with Certified Security Posture

Enterprise buyers require verified security credentials. Establish automated continuous compliance monitoring across infrastructure.

SOP: SOC2 CORE SECURITY CONTROLS AUDIT

```
1. Infrastructure: Enforce TLS 1.3 in transit and AES-256 at rest across all databases. 2. Personnel: Background checks + mandatory annual security awareness training. 3. Access: Enforce hardware 2FA and quarterly RBAC audits.
```

CRITICAL EXECUTION CHECKPOINTS & METRICS:

- [ ] Verify automated database backups are encrypted
- [ ] Confirm PR code reviews require at least 1 approval
- [ ] Enable cloud provider audit trail logs (AWS CloudTrail)

GDPR / CCPA Right-to-be-Forgotten & Data Export SOP

Honoring Global Privacy Mandates Without Manual Overhead

Establish deterministic database deletion scripts and customer export pipelines to fulfill statutory privacy requests within 30 days.

SOP: USER DATA DELETION & EXPORT WORKFLOW

```
Step 1: Authenticate identity of requester. Step 2: Run automated database purge script across primary DB, backups, analytics, and marketing lists. Step 3: Issue signed Certificate of Data Erasure within 30 days.
```

CRITICAL EXECUTION CHECKPOINTS & METRICS:

- [ ] Complete deletion within 30-day statutory window
- [ ] Ensure marketing CRM unsubscribe is synchronized
- [ ] Retain financial transaction logs as required by tax law
